

How to CREATE a ARCHIVE of CIRCA
or a hot backup just in case ...

Steps to reproduce and test protocol slides

1. Go to BEAR and get all his DATA!!

`www/bin/move_to_archive.sh`

```
BACKUP_SERVER_USER=circa@circa-backup.net1.cec.eu.int
#killall rsync # killall current syncs, if any
#kill -9 -f rsync
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-data.log $IRC_HOME/www/data/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:www/data/" &
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-irc.log $IRC_HOME/www/htdocs/irc/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:www/htdocs/irc/" &
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-inn.log $IRC_HOME/servers/inn-dir/inn-2.4.1/spool/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:servers/inn-dir/inn-2.4.1/spool/" &
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-mysql.log $IRC_HOME/servers/mysql/data/ircback/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:servers/mysql/data/ircback/" &
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-ldap.log $IRC_HOME/servers/openldap/bak/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:servers/openldap/bak/" &
rsync $DRY_RUN -av --delete --log-file=/ec/prod/server/circa/circa-forum/www/logs/rsync-logs.log $IRC_HOME/www/logs/ -e "ssh $SSH_PARAM $BACKUP_SERVER_USER:www/logs" &
```

2. disable backups on circa-backup (archive mode)

circa-backup.net1.cec.eu.int

BACKUPS ARE DISABLED!

www/bin/maintain_server.sh

```
#####  
# Duplicating the MySQL database #  
#####  
logmessage "Backing up the MySQL database..."  
MYSQLDIR=$IRC_HOME/servers/mysql  
logmessage "Stopping MySQL server..."  
$MYSQLDIR/bin/mysql.server stop  
logmessage "Copying MySQL database..."  
# Extreme test for extra safety  
if [ "X$MYSQLDIR" = "X" ]; then  
    logmessage "ERROR: MySQL directory not set"  
else  
    # commented for archive mode  
    #rm -rf $MYSQLDIR/data/ircback  
    #cp -R $MYSQLDIR/data/irc $MYSQLDIR/data/ircback  
fi
```

```
logmessage "Dumping LDAP database..."  
# commented for archive mode  
#$IRC_HOME/www/bin/ldap_backup.pl -f  
#LAST_LDAP_BACKUP_FILE=`ls -t $IRC_HOME/servers/openldap/bak/*.tgz | head -1`  
#logmessage "Searching for membership inconsistencies based on $LAST_LDAP_BACKUP_FILE..."  
#STAR xzof $LAST_LDAP_BACKUP_FILE | $IRC_HOME/www/bin/correct_ig_memberships.pl -c -m
```

3. restore or init mighty BEAR data load (~1 day)

circa-backup.net1.cec.eu.int

nidbs_bin/init_archive.sh

Delete all cache files in wrong byte order (solaris), i.e. What new section.
Will be created on the fly

cache cleaning

```
# clean all storable cache entries copied from the production server (wrong solaris byte order)
find www/data/ -type f -name .seclisting_sections_query -exec rm {} \;
find www/data/ -type f -name NEW -exec rm {} \;
find www/data/ -type f -name MEE -exec rm {} \;
find www/data/ -type f -name LIB -exec rm {} \;
find www/data/ -type f -name INF -exec rm {} \;
```

Sync ircback to irc and **!repair!** Table (~3h). Last sync from bear should be cold!

mysql

```
# cp mysql (sync it)
rsync -av --delete servers/mysql/data/ircback/ servers/mysql/data/irc/
# we have to wait until this is finished
# some tables might be corrupt. It is time to check this!!!
# solution: do a last cold rsync from bear
echo -ne "Please remember the root or the mysql root password for mysql right now ;-)"
servers/mysql/bin/mysqlcheck -u root -p --all-databases -r > mysql-check.log
```

ldif

move newest ldif back to newest.ldif and import. Import takes ~5h

```
# remove openldap current database
rm -rf servers/openldap/var/openldap-data/db?/*.dbb
# import the data
servers/openldap/sbin/slapadd -v -b "o=European Commission,c=be" -l newest.other.ldif &> slapadd-other.log
servers/openldap/sbin/slapadd -v -b "l=CIRCA" -l newest.circa.ldif &> slapadd-circa.log
```

TEST library: archive real doc of rica

The screenshot shows a web browser window with a library interface. The address bar displays the URL: `http://circa-backup.net1.cec.eu.int:6020/Public/irc/agri/rica/library?l=/fadn_network_animation/administration/forms_procedures&vm=detailed&sb=Title`. The browser's menu bar includes File, Edit, View, History, Bookmarks, Tools, and Help. The toolbar shows navigation icons and a search bar. The browser's tab bar contains several tabs, including "How to make a live...", "LiveCD - Communit...", "Creating Custom U...", "Find Files By Access, Modifi...", "SquirrelMail - Login", "DB BAHN - Verbindungen - I...", "Circa_digit_kom - R&B nidbs", "CIRCABC 3.4 User migratio...", "Attachment - R&B nidbs", and "CIRCA - Communica".

The library interface has a navigation bar with tabs: INFORMATION, LIBRARY, DIRECTORY, SEARCH, and HELP. Below the navigation bar, there is a search bar with the text "Library > Top/FADN network animation/Administration/Forms and procedures". The search bar includes a "List" button, a text input field, and a dropdown menu labeled "Any Field".

The main content area displays a table of documents. The table has columns: Title+, Items, Owner, Size, Date, Version, and Language. The table lists several documents, including "Previous Section", "Access procedure to Rica Informatic Systems", "Access request form", "Information on Organisation of FADN - Guidelines updated.doc", "Information on Organisation of FADN - Template", "New rules for reimbursement of experts", "Privacy Statement", "Privacy Statement Form for expert", and "Standard rules of procedure".

A preview window titled "information on Organisation of FADN -Template.doc" is open over the table. The preview window shows the document's content, which includes a header "INFORMATION ON THE ORGANISATION OF FADN" and a table with the following rows:

MEMBER STATE:	
ADMINISTRATIVE INFORMATION ON THE MANAGEMENT OF FADN	
Liaison agency for FADN (Art 7 Reg 1217/2009) nominated by the competent authority of for the purposes of FADN:	
TYPE AND LEGAL STATUS OF THE NATIONAL LIAISON AGENCY:	
RESPONSIBLE OF THE FADN LIAISON

TEST customised web templates archive (milk)

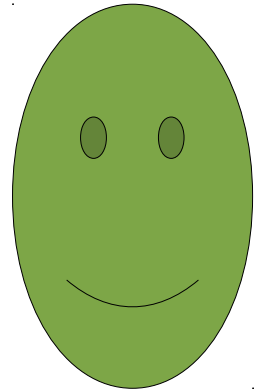

TEST customised web templates bear

Good Conclusion for test cases:

- mysql restore fine (metadata)
- openldap restore fine (members of IG and login)
- Data restore fine (access documents and library)
- Log-file sync fine (old history of documents)
- newsgroup fine
- Web templates fine (milk icon)

Bad Conclusion for test cases:

- What's new not there
- Moderation feature of newsgroups missing

Solaris / linux
Binary issue

```
[Wed Jan 16 10:16:31 2013] [error] CIRCA_Registry [21426] Byte order is not compatible at blib/lib/Storable.pm (aut  
/auto/Storable/_retrieve.al) line 315, at /ec/prod/server/circa/circa-forum/www/lib/irchome/whatsnew.pl line 630\n
```

Not working: active innd and smtp server

Missing from server list: **smtp** and **innd**

Active Internet connections (only servers)						
Proto	Recv-Q	Send-Q	Local Address	Foreign Address	State	PID/Program name
tcp	0	0	0.0.0.0:6020	0.0.0.0:*	LISTEN	21423/httpd
tcp	0	0	0.0.0.0:6028	0.0.0.0:*	LISTEN	21324/slaped
tcp	0	0	0.0.0.0:6030	0.0.0.0:*	LISTEN	21367/mysqld

- no new emails will be sent
- no new discussions
- no new post for discussions
- probable reason that moderation feature is missing

Can be sold as an improved archive feature
or fixed if needed (install smtp, deep debug innd)
